

Quality Test Solutions for Superior Quality of Service

## Communication Devices

### TP05D Test Set

049365

- Lightweight
- Easy to use unit
- High Impedance
- Voltage Lockout
- Shows line voltage and Polarity

The TP05D is the perfect tool for the day today needs of telecom and data technicians.

### TP99 Test Set

049350

- Rugged
- Easy to Handle

Features like Datasafe with the high impedance monitor, Direct buttons for flash, memory and volume, Tone / Pulse dialing and Complex or real impedance

### TP390 Test Set

049355

- Water resistant Butt Set
- Line Polarity ID
- Lightweight
- Easy to Handle
- Rugged

Ideal for Installation, Setup and Maintenance.

## Cable Testers

### KE6000

049400

Kurth Electronics new Network Cable Tester makes verification of LAN cabling fast and easy. Its small but durable design allows for convenient handling by network technicians.

### KE-TDR06

4403400

Cable Fault Location up to 6000m (19,800ft), Zero dead zone, Simple to use, Cable Impedance selectable, Continuous scan and scan lock function, Ultra-Bright 64 x 128 Electroluminescent LCD, Backlite and Rugged Custom Enclosure designed for Field Use.

## xDSL Tester

### KE3400

049820

- Tests ADSL, ADSL2, ADSL2+, and VDSL in one Compact, Rugged and Cost Effective Solution
- ATU-R and ATU-C Emulation
- Built in Ethernet Through-port
- IP Ping Test, V-LAN Tagging
- Voltage Test for Line Verification
- User Settable Parameters
- Stores up to 100 Test Results
- Download Capability to Local PC
- (Optional) Application Software for Graphical Display of Results
- Built in Charge Circuit

# Tone & Probe Kits

## KE301

049562

Classic - Basic cable finder set to trace any kind of cable, wires and pairs of wire.

- Four built-in tones
- High power output
- Tracks cables inside walls
- Precise pair identification
- Traces tone in live phone lines
- Identifies line polarity
- Identifies voltage on Tip and Ring
- Indicates clear, busy and ringing line
- Tests for short and open in a line
- Supplies talk battery power for a buttset
- Low battery indication
- Auto shut off

## KE401

049563

IT - Cable Finder Kit with "Data Protection" to trace any kind of cable, wires and pairs of wire.

- Four built-in tones
- High power output
- Reduced crosstalk because Sine wave signal
- Data Port test with LINK - Blink
- ISDN / ADSL signal identification
- Low battery indication
- Auto shut off
- RJ45 jack protection

## KE501

049564

Electric - Cable Finder Kit to trace any kind of cable, wires and pairs of wire. Over voltage protected in any tone mode up to 400V AC

- Four built-in tones
  - High power output
  - Cable tracking inside walls
  - Precise pair identifying
  - Low battery indication
  - Auto shut off
  - Over voltage protected up to 400V AC
- ALARM LED >90 VAC

## KE701

049567

Telco - Cable Finder Kit locates wire faults and identifies specific wire pairs, split pairs and locates broken pairs/cables

- Four built-in tones
- Low batt indication
- LED ON- Indication
- High power output
- Less crosstalk because Sine wave signal
- No disturbing of digital services
- Data Port test with HUB - LINK - Blink
- ADSL signal identification
- Audible and visually continuity testing
- Resistance metering by audible frequency

# KE1001

049581

Security - Cable Finder Kit Multi-function Tone Generator and Probe to trace any kind of cable, wires and pairs of wire in combination with latched CONT/DISC test for sensors, switches and circuits used in Security- /Alarm Systems

- Five built-in tones
- Line monitor ON HOOK/OFF HOOK
- Cable tracking inside walls and bundles
- Precise pair identifying in distribution box
- Latching of continuity and discontinuity
- Resistance test up to 10 Megaohm
- Amplified high ohmic line monitor with speaker
- Low battery indication
- Auto shut off
