

Flatpack2 Power Systems

Overview:

The Eltek Valere *Flatpack2* line consists of versatile, scalable, and highly-configurable systems tailored to customer requirements. Use of established components—including the efficient and reliable *Flatpack2* rectifier, the robust *Smartpack* controller, and flexible distribution units—makes for optimal system design and cost-effective deployment.

Flatpack2 +24V 600A

Flatpack2 Power System

The *Flatpack2* (FP2) power core features an impressive array of distribution configurations and options. Its compact design and efficient use of space complement sites with limited floor and rack space, opening room for better airflow and additional equipment. *Flatpack2* chassis are designed to mount in standard 19" or 23" telecommunications racks. Standard, fully-populated configurations accommodate four to sixteen *Flatpack2* rectifiers, yielding total power output ranges of 8kW to 32kW.

Distribution Features

- Breaker alarming
- Low-voltage disconnect (LVD) contactor options
- Horizontal load landings, vertical bulk battery landings
- Three distribution options for different power levels:
 - Small 1U, 175A shelf with controller slot, LVD option, up to six protected output buses, and up to two unprotected battery buses
 - Three-bus, 600A, 19" wide, 4U high panel with 20 positions for plug-in circuit breakers or fuse holders, up to two LVD contactors, and rear bulk battery terminals
 - Three-bus, 600A, 23" wide, 4U or 6U high panel with 24 positions for plug-in circuit breakers or fuse holders, emergency power-off (EPO) switch, up to two LVD contactors, and rear bulk battery terminals; an additional 23" distribution panel option doubles the number of cable landings.

Flatpack2 Rectifiers

- **New!** *Flatpack2 HE* with **96%** typical efficiency
- Input voltage range: 85 – 290 VAC
- 2000W DC output (constant power)
- 1U in height; 4.25" in width
- Hot-swap/hot-plug functionality
- Automatic active load sharing

Smartpack Controllers

- Provide comprehensive system monitoring and control in a single unit
- Local and remote interfaces
- *PowerSuite* software for computer interface
- Advanced battery-monitoring and thermal compensation
- Various models providing up to six configurable alarm inputs and output relays
- Web model for TCP/IP or SNMP communication
- Slave controller option for larger systems

Power Shelves

- Accommodate up to four rectifiers each
- 1U height (1.75"); 19" width
- Individual and dual AC feed options
- Mounting brackets for 19" and 23" racks

Agency approvals for the 48V/150A configuration are pending

Distributions

Flatpack2 150A

The -48V/150A system offers five standard distribution configurations which are defined by the number of breaker or fuse positions available. Distribution consists of up to three sets of two parallel buses, with each bus having its own front-access, plug-in breaker (or plug-in fuse holder) position and rear-access cable landing. This parallel configuration permits each set of two buses to be linked together by a two-pole plug-in breaker. Additionally, one low-voltage disconnect (LVD) contactor may be installed.

FP2 -48V/150A Configurations*	2B 2L	2B 2L GMT	2B 4L	4L GMT	6L
100A battery breaker positions	2	2	2	0	0
60A load breaker positions	2	2	4	4	6
12-position, 65A GMT fuse block	No	Yes	No	Yes	No
2 unprotected bulk battery landings	No	No	No	Yes	Yes

*Please consult with a sales representative for other available configurations

Flatpack2 300A, 600A, and 1200A

The larger Flatpack2 systems make use of a unique front-access distribution section that features three discrete parallel buses. Each bus has positions for breaker holders that screw into one of the three buses. This arrangement facilitates a variety of convenient uses for each bus, such as protected battery connections, load-shedding, and converter output. Kits are available for double-pole and triple-pole breakers. Bulk battery cable landings are available in the rear of these distributions. There are also options for up to two LVD contactors.

Distributions*	300A	600A	1200A

Power Modules

Flatpack2 Rectifiers

Flatpack2 rectifiers are available in two voltages: 48V and 24V. They are hot-swap, switched-mode power supply units that deliver a constant 2000W of DC power.

Flatpack2 Rectifiers*	HE (48V 2000W)	48V 2000W	24V 2000W
Module Image			
AC Input Voltage	Range: 85-300 VAC Nominal: 185-275 VAC	Range: 85-300 VAC Nominal: 185-275 VAC	Range: 85-290 VAC Nominal: 176-275 VAC

Flatpack Converters

Flatpack DC-DC Converters can be ordered for Flatpack2 systems. Converter shelves are delivered in sets of two or four shelves (four or eight converters, respectively). Each shelf accommodates up to two converter modules. In 300A, 600A, and 1200A distributions, converter output can be routed to one of the three parallel load buses.

Flatpack DC-DC Converters*	48V to 24V	24V to 48V

Controller Modules

Smartpack Controller

Smartpack is a robust, comprehensive control and monitoring device used for Eltek Valere's Flatpack2 systems. The controller communicates with each Flatpack2 rectifier through a CAN bus and provides real-time monitoring and control information. The Smartpack controller is accompanied by the PowerSuite software program for PC interface. Alarm inputs and output relays can be increased by using a master/slave configuration in systems that can accommodate two controllers.

Smartpack Modules*	Extended	Web/SNMP	Slave
